

for Burma

BP 880912
SIR: It is shocking to see in your newspaper pictures of many injured students hospitalised in Burma as a result of shooting by the military. More tragically, it is understood that hospitals are short of medical supplies.

As a friendly neighbour, I would like to urge the appropriate philanthropic organisations to arrange the dispatch of urgent hospital needs. Since this would be on purely humanitarian grounds, I don't think the Burmese authorities will have any objection.
